

MEET ROOST

Stop babysitting your AI at your desk.

Roost turns Claude Code or Codex into a pixel-art crew you text from your phone. An AI project manager sends every job to the right model. Free & open source — bring your own plan.

IT'S A GROUP CHAT

Your AI crew, in your pocket.

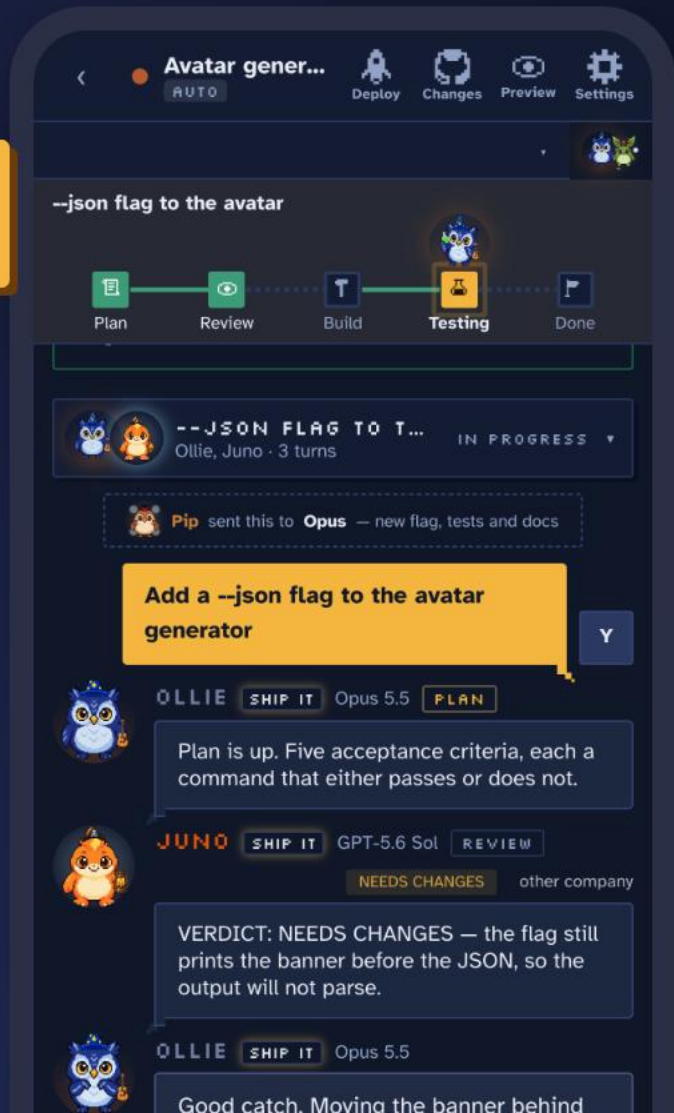

Text them in plain words. Watch it go from plan to build to tested — right on your phone.

Add a --json flag to the
avatar generator

Type @ to pick who
answers — @Ollie for
the hard stuff.

Type / for quick
actions like /plan and
/deploy.

ROOST

HOW IT WORKS

Pip picks the right model for you.

1 You send a message. **Pip**, your AI project manager, sizes it up.

QUICK
Sonnet

EVERYDAY
Opus

HARD
Opus, deep thinking

2 Big job? The **other company's** AI reviews the plan first.

3 Tests run. **You approve.** It ships.

\$20

\$100

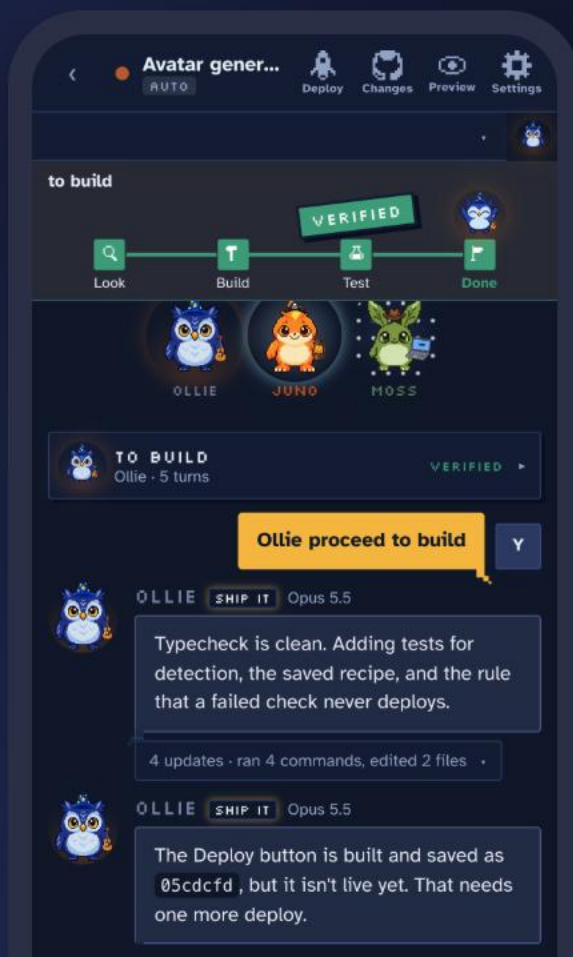

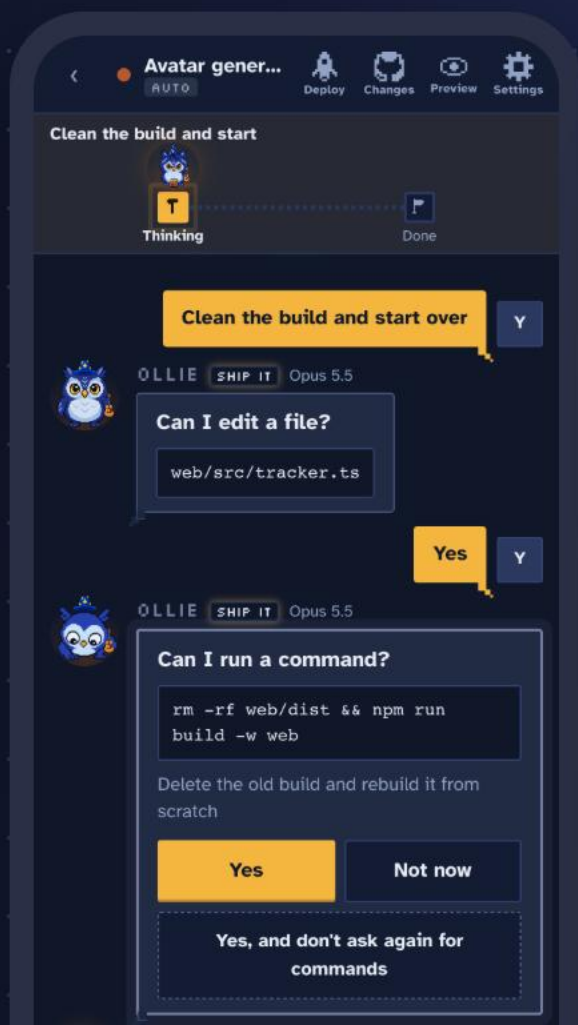

\$200

Pip fits the work to your plan. Claude only, Codex only, or both — all work.

YOU'RE IN CONTROL

They build. You approve.

Nothing risky happens without a tap. When the tests pass, it's stamped VERIFIED and ready to ship.

SMART ABOUT YOUR PLAN

Get the most from what you already pay for.

Tell Roost your plan. Pip spends it wisely — and tells you when your week is running hot or cold.

YOUR PLAN

\$20

\$100

\$200

Questions and chores: Sonnet. Everyday work: Opus. Hard problems: Opus (full thinking).

Pip: 47% of your week used with 2 days left — right on pace.

Per-project usage from Claude's and Codex's own logs — see which project, and which model, used your week.

ROOST

FREE & OPEN SOURCE - PRIVATE

To install it, just ask your AI.

Paste this into Claude Code or Codex:

```
> Install Roost from  
github.com/garrettjohnsondev/roost
```

- ✓ Runs on **your** computer — Mac, Windows or Linux
- ✓ Uses the Claude or Codex plan you already have
- ✓ Your code stays yours — reached privately with Tailscale
- ✓ Free & open source (MIT) — you bring the AI plan
